

**INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, AUGUST 15, 2005 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 140 fires reported. Three new large fires were reported, one each in the Eastern Great Basin, Western Great Basin and Northwest Areas. Five large fires were contained, two in the Northwest Area and one each on the Northern Rockies, Northern California and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Idaho, Minnesota, Montana, Nevada, Oregon, Utah and Washington.

**NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:**

BLACKERBY, Maggie Creek Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Larsen) is assigned. This fire is six miles southeast of Grangeville, ID in timber. Private residences, outbuildings, endangered species habitat, and power lines remain threatened. Structure protection measures continue to be implemented. The fire is spreading south towards Earthquake Creek.

CHINA TEN, Nez Perce National Forest. A Type 2 Incident Management Team (Thomas) is assigned. This fire is 15 miles east of Grangeville, ID in beetle killed lodgepole pine and subalpine fir. Active fire behavior with torching and short range spotting continues. The fire is adjacent to a significant Native American cultural area. Acreage increase is due to better mapping.

LONG RUGGLES, Craig Mountain Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Blume) is assigned. This fire is 22 miles southwest of Craigmont, ID in timber and brush. Residences and big game winter range habitat remain threatened. Steep, rocky terrain and limited access are impeding containment efforts. Isolated group torching, spotting and backing fire in timber was observed. A burn out operation to secure containment lines was initiated.

PROSPECT, Lolo National Forest. A Type 2 Incident Management Team (Cowin) is assigned. This fire is 12 miles south of Superior, MT in timber. Structures and historical sites remain threatened. Poor access and heavy fuels continue to hinder containment efforts. Sunny, dry weather contributed to increased fire activity. Burn out operations were completed.

DEVIL, Clearwater National Forest. This fire is 13 miles west of Lochsa, ID in timber and brush. Steep terrain is impeding containment efforts. Cultural sites along the Lolo Motorway are threatened. The incident reported torching, creeping and smoldering fire activity.

CEDAR, Clearwater National Forest. This fire is 18 miles northwest of Kooskia, ID in timber. Structure protection measures are being implemented. The fire continues to creep and smolder.

WEST FORK, Nez Perce National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is 26 miles south of Grangeville, ID in Douglas fir and ponderosa pine. The fire was active in continuous heavy fuels. The inversion lifted in the afternoon, increasing temperatures and dropping relative humidity, which resulted in torching and short range spotting.

SIGNAL ROCK, Beaverhead/Deerlodge National Forest. The fire is 17 miles southwest of Philipsburg, MT in timber. Increased winds produced spotting, crowing, small runs and downhill backing fire.

I-90, Lolo National Forest. A Type 1 Incident Management Team (Sandman) is assigned. This fire is one mile south of Alberton, MT in timber, and includes the West Mountain, Tarkio, Fish and Alberton East fires. Private residences, commercial properties, recreational sites and a major power grid remain potentially threatened. Torching and sustained crown runs in the interior were observed. The incident characterized the fire as smoldering with group torching and short crown runs. A burn out operation was completed.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. This lightning-caused Wildland Fire Use (WFU) complex, comprised of El Capitan, Elk Lake and thirty seven other fires, is 26 miles southwest of Hamilton, MT in timber and grass. The complex is being managed to accomplish resource objectives. Deep Creek Campground, Hells Half Acre Lookout and Coopers Flat Ranger Station remain potentially threatened; structure protection measures continue to be implemented. Minimal fire spread, primarily creeping and backing fire, was reported.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Steep terrain, abundant snags and limited access continue to hamper containment efforts. The Long Black fire continues to report active fire behavior with crown runs in the interior. The Long Creek fire is in monitor status, and minimal fire activity was reported.

ROCKIN, Bitterroot National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is 10 miles northwest of Darby, MT in timber. Residences and cultural sites remain threatened. Narrow canyons, steep, rocky terrain and adverse weather conditions continue to hamper containment efforts. Fire is actively burning in heavy fuels within a wilderness area. Burn out operations were completed.

LIMESTONE PEAK, Flathead National Forest. This fire, located in the Bob Marshall Wilderness, is 41 miles southeast of Bigfork, MT in timber, shrub and grass and is being managed with a confine suppression strategy. This will be the last report unless significant activity occurs.

KELLY POINT, Flathead National Forest. This fire is 38 miles southeast of Bigfork, MT in timber, and is being managed with a confine suppression strategy. This will be the last report unless significant activity occurs

RUNNING COMPLEX, Nez Perce National Forest. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Running Lake, Mud Lake and Long Prairie fires is 30 miles east of Lowell, ID in subalpine fir and mixed conifer. The fire is being managed to accomplish resource objectives. No new information was reported.

### NORTHWEST AREA INCIDENTS / LARGE FIRES:

BLOSSOM COMPLEX, Siskiyou National Forest. A Unified Command has been established between a Type 1 Incident Management Team (Lohrey) and an Oregon Department of Forestry Incident Management Team (Hunt). This complex, comprised of the Blossom, Huggins and Solitude fires, is 25 miles northeast of Gold Beach, OR in timber. Private structures, commercial rafting sites, historic mines and wildlife habitat along the Rogue River remain threatened. Inaccessible terrain, adverse weather conditions and heavy fuel loading are hampering containment efforts. Downhill backing fire and burning within the interior were reported.

SCHOOL, Umatilla National Forest. A Type 1 Incident Management Team (Anderson) is assigned. This fire is 16 miles south of Pomeroy, WA in timber. Steep terrain and rolling debris are hampering containment efforts. The incident reported moderate fire behavior. Burn out operations continue.

TRYON COMPLEX, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Lunde) is assigned. This complex, comprised of the Haas Ridge, Tryon and Cherry Creek fires, is 20 miles north of Imnaha, OR in timber and grass. A power transmission line, residences, heritage/cultural resources, grazing allotments and wildlife habitat remain threatened. Steep terrain, smoky conditions and limited access are hindering containment efforts. Structure protection measures continue. The fire is backing into drainages and smoldering in heavier fuels.

SPRING CREEK, Wallowa-Whitman National Forest. This fire is 10 miles west of La Grande, OR in timber and grass. No new information was reported.

BURNT CABIN, Umatilla National Forest. A Type 2 Incident Management Team (Johnson) has been ordered. This fire is 16 miles southeast of Milton-Freewater, OR in timber. Road and trail closures have been implemented. Residences, commercial properties and lynx habitat are threatened. Active fire behavior with high rates of spread, isolated torching and short range spotting were reported.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A Wildland Fire Use Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. Moderate to high fire activity was reported. Short uphill runs and downhill backing fire were observed.

 SES - Washington State Department of Natural Resources -- Southeast.

**EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

CADAGAN COMPLEX, Salmon-Challis National Forest. Type 2 Incident Management Team (Brunner) is assigned. This complex, comprised of the Hale Gulch and Bear Basin fires, is 15 miles west of North Fork, ID in Douglas fir and heavy dead and downed fuels. Private residences and commercial property remain threatened. Difficult access, rolling materials and steep terrain are hampering containment efforts. Smoke is impacting nearby communities. Intense surface fire with torching, creeping and smoldering was observed.

JACOB, Arizona Strip, Bureau of Land Management. This fire is being managed in conjunction with the Brumley fire, 39 miles southwest of St. George, UT in brush and grass. Desert Tortoise habitat is threatened. Rough terrain and difficult access is hampering containment efforts. Running fire behavior was observed.

BRUMLEY, Arizona Strip, Bureau of Land Management. This fire is 45 miles southwest of Saint George, UT in grass, brush and yucca. This fire will be managed in conjunction with the Jacob fire. This will be the last report.

FRANK CHURCH, Payette National Forest. A Fire Use Management Team (Bonefeld) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root, Center, Missouri Ridge and nine other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Structure protection measures are in place. Slow to moderate rates of spread with isolated torching and spotting was reported.

### ALASKA AREA INCIDENTS / LARGE FIRES:

BOUNDARY CREEK, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce and hardwood litter. A portion of the fire is in Canada. Structures in Dome and O'Brien Creek are threatened. Structure protection measures continue to be implemented. Running crown fire and 50-foot flame lengths were observed.

GRAYLING CREEK, Alaska Fire Service, Galena Zone. This fire is 15 miles northwest of Anvik, AK in timber. No new information was reported.

MISSION CREEK, Alaska Fire Service, Upper Yukon Zone. This fire started on Alaska Native Claims Settlement Act land nine miles west of Eagle, AK in black spruce and tundra. This fire has been placed in monitor status. No new information was reported. This will be the last report unless new information is received.

### SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

PINYON COMPLEX, Inyo National Forest. This complex, comprised of the Oak Creek, Pinyon and Hogback fires is six miles northwest of Independence, CA in timber and brush. Creeping and moderate burning were reported. No further information was received.

COMB COMPLEX, Sequoia & Kings Canyon National Park. A Fire Use Management Team (Clark) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Comb and East Creek fires is 18 miles northeast of Grant Grove, CA in mixed conifer and chaparral and is being managed to accomplish resource objectives. Moderate fire behavior with slowly backing and flanking fire continues.

## OUTLOOK:

**Fire weather watches:** For dry lightning in north-central and northeastern Nevada.

**Weather Discussion:** Warming conditions will move into the interior Northwest and over Idaho today with low relative humidity persisting. A weather disturbance moving onto the California coast today will generate mainly dry thunderstorms over interior of California and northern Nevada, with a mixture of wet and dry thunderstorms over southern Nevada. Wet thunderstorms will develop over the four corners region by afternoon. Alaska will see one final day of extreme hot, dry, and smoky conditions before a cooling trend and chance for showers begin on Tuesday. Winds will increase to 25 to 30 mph today over the interior of Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Northern California</b> Afternoon thunderstorms over the high country and east, from the Lassen National Forest south.	Mountains mid: 70s to upper 80s. Interior valleys: 90s to 102	12 to 25% driest inland areas.	Southeast to southwest 5 to 10 mph with gusts to 18 mph, slightly stronger near the coast and east of the Cascade-Sierra crest.
<b>Western Great Basin</b> Partly to mostly cloudy skies with isolated to scattered showers and thunderstorms. Thunderstorms in north-central and northeastern Nevada are likely to be dry.	North Valleys: 84 to 98 South Valleys: 85 to 104 Mountains: 70 to 84	North Valleys: 8 to 18% South Valleys: 20 to 28% Mountains: 16 to 30%	Southeast to southwest 5 to 15 mph with afternoon gusts of 20 to 25 mph.
<b>Southern California</b> Morning low clouds and fog coastal areas, otherwise mostly sunny in the morning becoming partly cloudy in the afternoon with a few showers and thunderstorms over the Sierra, Inyo, Southern California and the Deserts.	79 to 90 mountains. 85 to 92 valleys. 95 to 100 upper deserts. 95 to 105 lower deserts.	15 to 30%.	Southeast to southwest 5 to 15 mph.
<b>Eastern Great Basin</b> Mostly sunny and dry Idaho. Scattered showers and thunderstorms Utah, more numerous southern Utah mountains.	<b>Idaho, Bridger-Teton:</b> 68 to 76 mountains, 77 to 93 valleys. <b>Northern Utah:</b> 71 to 83 mountains, 83 to 94 valleys. <b>Southern Utah, Arizona Strip:</b> 69 to 85 mountains, 85 to 97 valleys	<b>Idaho, Bridger-Teton:</b> 17 to 24% mountains, 12 to 20% valleys. <b>Northern Utah:</b> 18 to 28% mountains, 10 to 18% valleys. <b>Southern Utah, Arizona Strip:</b> 28 to 44% mountains, 16 to 30% valleys.	<b>Idaho, Bridger-Teton:</b> West 10 mph. <b>Northern Utah:</b> Upslope/upvalley 5 to 10 mph. <b>Southern Utah, AZ Strip:</b> Upslope/upvalley 5 to 10 mph.
<b>Northern Rockies</b> Weak upper level ridge moves over region bringing warmer temperatures and westerly flow. Possibility of evening showers and thunderstorms along northern Divide.	West of Divide: 75 to 85 East of Divide: 80 to 85 North Dakota: 80 to 85	West of Divide: 20 to 25%. East of Divide: 20 to 30%. North Dakota: 30 to 45%.	West of Divide: west 5 to 10 mph with some higher gusts possible. East of Divide: light/variable. North Dakota: light/variable
<b>Alaska</b> Mostly sunny and smoky with isolated evening showers or thunderstorms possible along the Alaska Range.	70s and low 80s.	25 to 40%.	Northeast 10 to 15 mph.

### PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
  - RH
  - Winds
  - Fire Behavior
  - Topographical boundaries
  - Time constraints/Time of day
  - Time/distance to safety zones
  - Loss of support resources (airtankers, helicopters, etc.)
  - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
  - Gather information to assure good Situational Awareness
  - Assess hazards to anticipate serious risks
  - Establish hazard controls to mitigate serious risks
  - Make decisions based on your ability to mitigate those serious risks
  - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
  - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
  - Account for all your people
  - Make sure everyone knows and follows the new plan
